3D Site Plan

Butte Des Morts Elementary School Playground Menasha, WI

Project Need: Martenson & Eisele, Inc. was contacted by the principal of Butte Des Morts Elementary School in 2012, to help develop a site plan of the school's playground to be used for fundraising purposes. The site plan was to capture not only school recreational needs but those of the adjacent neighborhood as well.

Project Approach: M&E developed a several site plan scenarios for School District representatives to review and offer comment. Site visits and photos were taken and utilized within a computer generated program named "Revit" to allow for the generation of different 3D perspectives. Cost estimates for each improvement were provided in a phased format.

Project Result: The Site Plan continues to be utilized for fundraising purposes in hopes of becoming a reality for this Menasha residential neighborhood.
