

Martenson & Eisele, Inc.

Plan It. Design It. Build It.®

Planning - Environmental - Surveying - Engineering - Architecture

Martenson & Eisele congratulates the Green Bay Comprehensive Treatment Center as the facility prepares to open in its new location. After running out of room at its old location, a larger building was purchased, gutted and remodeled with M& E's Architects in charge of the design. The photos below show the remodeled facility inside and out. The final picture shows the building's exterior prior to renovation.
