St. Mary Catholic Middle School Students visit Martenson and Eisele, Inc.

Members of the St Mary Catholic Middle School of Neenah STEM (Science, Technology, Engineering and Math) Club visited M&E as part of the VEX IQ Robotics research competition. The group is focusing on flooding from climate change. Our own Abby Maslanka talked to them about stormwater management practices and how climate change may affect flood management in the future.

Good luck to the team in future tournaments!
