## Town of Clayton Comprehensive Plan 2016-2036

On August 17<sup>th</sup>, 2016, the Clayton Town Board adopted the *Town of Clayton Comprehensive Plan 2016-2036*. The plan was developed by Martenson & Eisele. The town's comprehensive plan was last updated in 2009, but the plan required updating due to a number of factors and town initiatives. In addition to reviewing and amending all nine required elements of the Comprehensive Plan, updates were made to goals, objectives, policies and recommendations. All maps were updated including the Future Land Use Plan which showed far more detail than the previous plan.

Developed under the direction of “The Best Way to Predict the Future is to Create It”, the updated comprehensive plan will guide the Town into key initiatives including the implementation of public infrastructure (sewer, water, parks, trails) and a new town “Working Lands” directive that will preserve important farmland and agricultural culture in, in balance with a growing east side community.
